

INDEX -- ILLUSTRATIONS page number

- 4 Test engine specs. & results 16-19
- Table 5.5 Various blower sizes & blower overdrives 23
- 6.1 Polarity & Firing order 24
- Table 6.5.1 Spark advance recommend. for 6% nitro with diff ignition systems 25
- 12.7 Crew instructions 44-45
- 13 Test plan 46
- 15 Air density effect 56-59
- 15.1 Air temperature effect 56-57
- 15.3 Air pressure effect 57
- 15.5 Air humidity effect 58
- 15.8 Nozzles & jetting for weather effects 59
- Equation 15.8.1 Inlet air density 59
- 16 Horsepower corrections from weather effect 60-64
- Horsepower effect example 1 (2,200 HP) 62
- Horsepower effect example 2 (4,000 HP) 62
- 17 <http://airdensityonline.com> track forecast 65
- Test 1 straight methanol setup & results 68
- Test 1a straight methanol setup & results 69-78
- <http://airdensityonline.com/pro-calcs/> data entry 69
- <http://airdensityonline.com/pro-calcs/> nozzle data entry 70
- <http://airdensityonline.com/pro-calcs/> main bypass calculator illustration 71
- Table 17.6.1 Nozzle & jetting for testing in different air densities 72
- Test 1a (methanol) engine cylinder location 73
- Table 17.12.1 Setups for test engine 75
- Table 19.6.1 AFRs & Lambda for Nitro up to 30% 87
- 19.8 Lambda values 89
- 20.4.1 Equation for stoichiometric combustion 91
- Table 20.5.1 Btu's Nitro & Methanol combustion up to 30% 92
- 21 Power output equation 95
- 22.3 Measuring units reference 104
- 22.4.1 Methanol specific gravity 105
- 22.4.2 Nitro specific gravity 105
- 22.4.3 Specific gravity for 6% nitro with 94% methanol 106
- 22.6 Physical weight of 6% nitro with 94% methanol 107
- Table 22.7 Percent (%) nitro in methanol fuel mixture based on **specific gravity** 107
- 23 Air to fuel ratio determination example 108
- Test 2 (6%) engine cylinder location 112
- Test 2 (6%) spark plug results 112-113
- Table 27: Jetting Summary 127
- 28 Test (0-30%) results summary 129-133
- 29 Turning it up (30% with more blower) summary 134-135
- Table 30 Btu's of Nitro & Meth. stoich. combustion up to 100% 136
- Table 31.2.1 Fuel costs per 1/4 mile Nostalgia Drag Race Run (2010 US Dollars) 140
- App 1 Calculation for AFR enrichment and lambda 144
- App 2 Total compression ratio calculation 144
- App 3 Rotary engine size 145
- App 4 Btu's computation example for Table 20.5.1 & App 6 145
- App 5 AFRs & Lambda for Nitro up to 100% 146
- App 6 Btu's for Nitro combustion up to 100% 147
- App 7 Enrichment analysis for 6% nitro at 3.3 to 1 AFR 148
- App 8 Amount of nitro by volume computation @ 80 deg. F 148
- App 9 Jet size 149
- App 10 Nitro mixing Pints by Volume for 5 gal. of mixture 150
- App 11 Nitro mixing Quarts or Gallons by Volume for 5 gal. of mixture 151
- App 12 Nitro mixing Liters by Volume for 10 liter of mixture 152
- App 12a. Chemical equation example for 30% nitro 153
- App 13 Nitro mixing Amount by Weight using **specific gravity** 154-155
- App 14 & 15 Numerical control for tuning 156-157
